

YOUR 10 POINT RESEEDING PLAN

1. Soil test and identify deficiencies
2. Spray off the old sward
3. A fine, firm seed bed is essential
4. Select a grass seed mixture based on intended field use
5. Sow into warm soil at a rate of 14kgs of grass seed per acre
6. Apply N, P, K and lime into seedbed as required
7. Roll well afterwards to ensure good seed to soil contact
8. Monitor pest attacks and take immediate action where necessary
9. Post-emergence spray is essential
10. Graze the new reseeds frequently to encourage tillering and clover

SERVING WEST CORK COMMUNITIES SINCE 1903

We can advise on all aspects of reseed, from sprays, grass mixtures, weed control and fertiliser planning.

Bandon Co-op has a comprehensive range of grass seed mixtures to suit almost all farm situations but should you require any special mixes or further information please contact our Agri Division.

GRASS SEED MIXTURES

Containing the best varieties on the 2025 Teagasc Pasture Profit Index

2025

bandoncoop.ie/agri

No. 1: INTENSIVE SILAGE

TOLLYMORE	5.00 kgs
MOIRA	3.00 kgs
ASTONCONQUEROR.....	3.40 kgs
CLODAGH - White Clover.....	0.60 kgs
44% Tetraploid.....	12.00 kgs

- Dual-purpose varieties, with potential for 2 cuts of silage
- Can also be grazed as it scores highly on **Teagasc Grazing Utilisation Index** in 2025 Pasture Profit Index
- High spring growth allows for early first cut

No. 2: INTENSIVE GRAZING

GLENFIELD.....	3.00 kgs
ASTONENERGY	4.40 kgs
ASTONCONQUEROR.....	4.00 kgs
CLODAGH - White Clover.....	0.60 kgs
64% Tetraploid.....	12.00 kgs

- Premium grazing mixture, available with and without clover
- **ASTONENERGY** is a leading quality variety on 2025 Pasture Profit Index
- All varieties score **4 or 5 stars on the Teagasc Grazing Utilisation Index** meaning excellent graze-out, sward quality and promotes clover
- GLENFIELD and ASTONCONQUEROR have leading spring growth and total yield values on 2025 Pasture Profit Index

No. 3: HIGH CLOVER

GLENFIELD.....	3.00 kgs
ASTONENERGY	4.00 kgs
ASTONCONQUEROR.....	3.00 kgs
CLODAGH- White Clover.....	1.00 kgs
DUNGLOE - White Clover.....	1.00 kgs
70% Tetraploid.....	12.00 kgs

- High **spring growth** varieties compensates for poorer spring growth of clover
- Best graze-out with **4 and 5 star graze-out varieties** - more light at base encourages clover growth
- Higher clover inclusion ensures maximum clover benefit
- CLODAGH and DUNGLOE are the **highest performing** White Clover varieties

Bandon Co-op mixtures are formulated with our local Teagasc advisors to bring the best swards to the area.

Our mixtures only contain varieties which are listed on the current DAFM Recommended List and the Teagasc Pasture Profit Index.

Proven performance under our growing conditions and will deliver more under grazing or silage as required.

No. 4: RED CLOVER SILAGE

TOLLYMORE	4.00 kgs
MOIRA	3.50 kgs
CLODAGH- White Clover.....	0.50 kgs
FEARGA- Red Clover.....	4.00 kgs
12.00 kgs	

- Highly productive silage sward with low requirement for chemical Nitrogen
- Produce **high crude protein** feedstock for winter feeding producing animals
- Very palatable silage that **drives animal performance**
- FEARGA and CLODAGH are most persistent and productive clovers
- Qualifies for Red Clover Silage Measure 2025 payment of €300/ha

No. 5: 100% TETRAPLOID GRAZING/OVERSEEDING MIX

GLENFIELD.....	4.00 kgs
ASTONENERGY	4.50 kgs
TOLLYMORE	2.50 kgs
CLODAGH - White Clover.....	1.00 kgs
100% Tetraploid.....	12.00 kgs

- All excellent grazing varieties, ensuring an easy to graze sward
- Erect growing habit, ease of grazing plus **high quality ensures high animal performance**
- Larger seeds of tetraploid makes this mixture most suited to **overseeding** if needed
- CLODAGH White clover most productive and persistent white clover

No. 6: HEAVY LAND MIXTURE

ASTONCONQUEROR.....	4.00 kgs
MOIRA	4.00 kgs
ASTONENERGY	3.40 kgs
CLODAGH - White Clover.....	0.60 kgs
30% Tetraploid.....	12.00 kgs

- Grass mixture with high yield and quality with a **focus on ground cover**
- Suitable for **heavy land areas** or where less intensive grazing is intended

Multi-species swards available on request.
